

DATA ANALYST

Data-driven analyst with hands-on experience applying R, Python, and SQL to sports analytics. Skilled in building predictive models and automated data pipelines that translate raw data into actionable insights for coaches, players, and decision-makers. Combines a strong statistical foundation from a Statistics degree and an MS in Business Analytics with practical experience in machine learning, data science, and application development.

EDUCATION

Wake Forest University School of Business, Winston-Salem, NC
Master of Science in Business Analytics, May 2027

Wake Forest University, Winston-Salem, NC
Bachelor of Science in Statistics, Minor in Mathematics, May 2026

AREAS OF EXPERTISE

Data Analysis | Predictive Modeling | Sports Analytics | Teamwork | Communication | Time Management | Multivariate Statistics
Data Visualization | Statistical Analysis | Machine Learning | Feature Engineering | Data Automation | Leadership | Adaptability
Application Development | Presentation Skills | Problem-Solving | Attention to Detail | Probability Theory | Organizational Skills

TECHNICAL SKILLS

Programming Languages: R, Python, SQL, Java, Excel, R Shiny
Predictive Modeling & Machine Learning: XGBoost, Nested Modeling, Probability-Based Modeling (Whiff, Strike & Swing Probabilities), Linear Regression (Lasso & Elastic Net), Logistic Regression, Clustering Analysis (KNN)
Data Analysis & Automation: Exploratory Data Analysis, Automated Data Collection Pipelines, Data Visualization (Tables & Graphs)

PROFESSIONAL EXPERIENCE

DATA ANALYST | Wake Forest Baseball | Winston-Salem, NC August 2023 – Present

- Member of the leading analytics department in college sports, supporting advanced scouting and performance-evaluation initiatives for a high-performance team.
- Built predictive models and automated scouting reports in R to aid in decision support for coaches.
- Applied SQL and R to analyze and visualize performance data through tables and graphs for coaches and players.
- Developed and maintained a data application to display analytics for coaches and athletes, focusing on aiding accessibility.

DRAFT PROCESS ASSISTANT | Major League Baseball Agent Aid | Nashville, TN (Remote) May 2025 – June 2025

- Worked directly with a professional agent to evaluate and present college baseball players' skill sets and draft profiles.
- Prepared scouting write-ups and reports submitted to Major League teams to support players' draft evaluations, ensuring accurate and consistent translation of player metrics into scouting narratives.

ANALYTICAL PROJECT EXPERIENCE

WAKE FOREST BASEBALL ANALYTICS

- xRV (Expected Run Value) Model Revamp: Rebuilt the team's expected run value framework using XGBoost and nested modeling techniques to estimate run value from pitch-level outcome probabilities. Combined outputs from multiple probability models into a unified framework to produce more accurate, pitch-level run value estimates, improving predictive accuracy by 10% over the previous models.
- Expected Run Value Heat Map: Developed opposing player specific automated heat maps using revamped Expected Run Values to assist in the decision making of coaches, thus enhancing the team's advance scouting capabilities.
- Matchup Matrix: Modeled automated matchups between Wake Forest pitchers and opposing hitters and created a clean visualization to assist in the high leverage decision making of coaches during the game.
